The Lusa A2 SMG was developed and manufactured in Portugal with help from Heckler and Koch and later relocated to New Hampshire.

The Lusa A2 is very similar to the H&K MP5 and the trigger group is nearly identical. The barrel is quick-charge and the bolt and bolt carrier is one unit.

The Lusa A2 carbine is an exceptionally accurate rifle with fully adjustable sights and has been approved by the BATFE for sale to the civilian market. These superlative firearms have a durable powder coat finish that will stand up to harsh use and cleaning chemicals.

Every model of the Lusa A2 comes with a one year manufacturer warranty.

Unlike most contemporary assault type weapons, the only plastic found on the Lusa A2 is the foregrip and pistol grip. Nealy all parts are manufactured on CNC equipment and made in the United States using INDEP/HK tooling. All are held to the highest standards and assembled in our modern facility in New Hampshire.

All Lusa A2 carbines come standard with:

- Sight adjustment tool
- Barrel shroud
- Gun lock
- Short display barrel
- Comprehensive owners manual
- One year manufacturer warranty

Optional Accessories

- Top rail system for mounting sighting devices and other accessories
- PDW style side folding stock. Longer than our standard stock and the same as HK uses on their MP5KPDW
- Spare magazines
- .22 caliber conversion kits
- 3 point slings
- Suppressors

Specifications
